### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The instant invention has been deemed to be an unobvious improvement over U.S. Patents 6655511 to Lun et al and 5947238 to Jolly et al. Lun et al and Jolly et al each disclose a piston core for a magnetorheological fluid damper having first and second piston cylinders and a piston center longitudinally disposed between and coupling the first and second piston cylinders. The unobvious improvement includes the use of high-performance magnetic material for the piston center.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
